

Tome Kovačević

iTALC

- iTALC je program koji je razvijen posebno za rad u školama
- iTALC je korisno i snažno didaktičko sredstvo za učitelje
- Omogućuje pregled i upravljanje drugim računalima u mreži tj. uvijek imate potpunu kontrolu nad svojom učionicom
- Preuzimanje je besplatno, ali ako koristite iTALC, zapamtite stotine sati koji su potrošeni u razvoju ovog softvera.
- Izvorni kôd je slobodan
- Podržava Linux, Windows XP, Vista i Windows 7

Komercijalni ekvivalentni programi

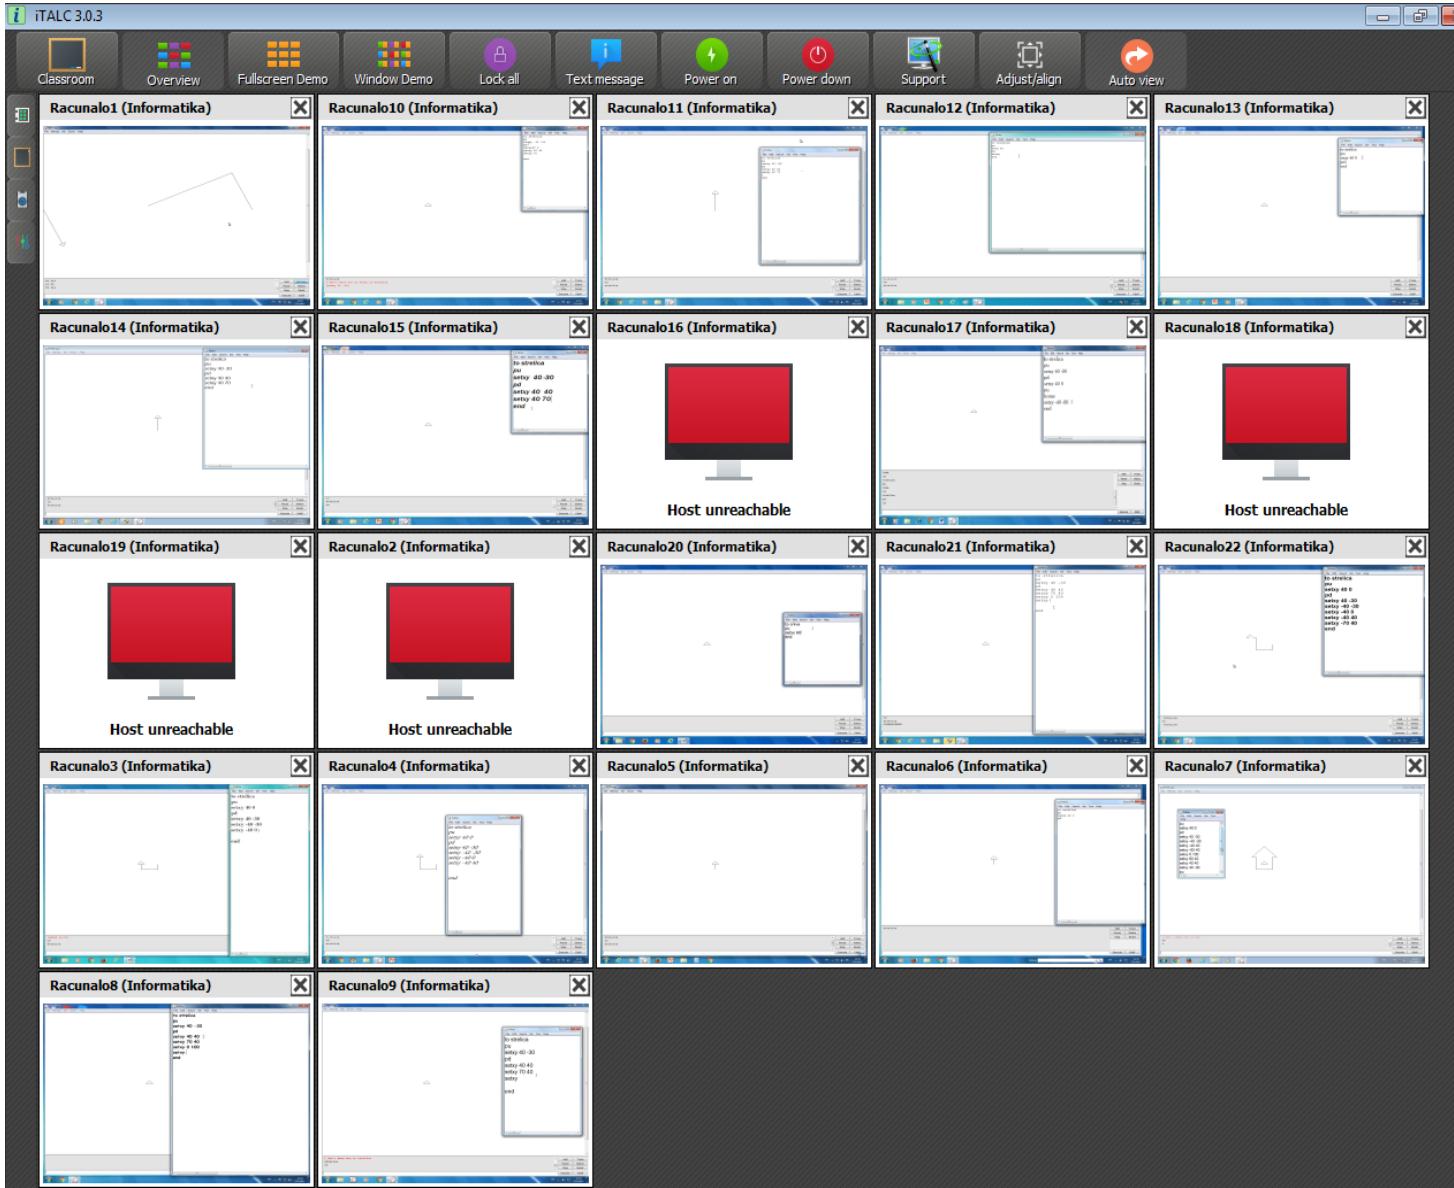

\$ 169.00
1 instruktor i 20
studentskih
licenci za učenje

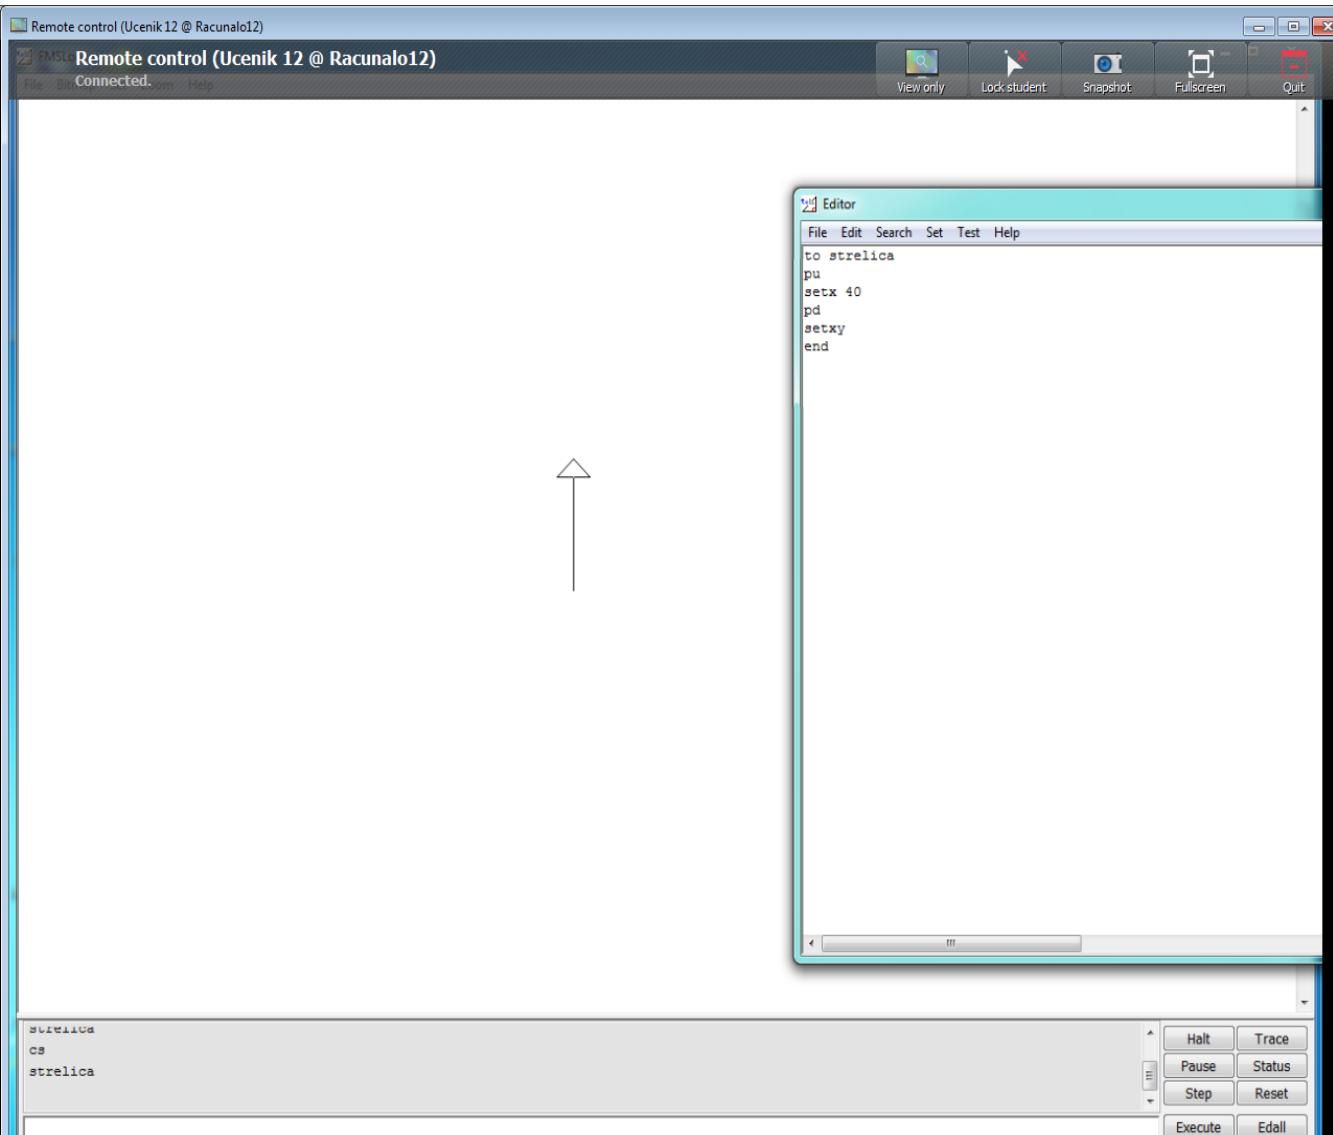

Monitor studenata

- Pratite učenike/studente pomoću prikazanih ikona
- Ostale značajke poput snimke zaslona, internetske povijesti i praćenja tipki pomažu u održavanju sigurne okoline za sve učenike

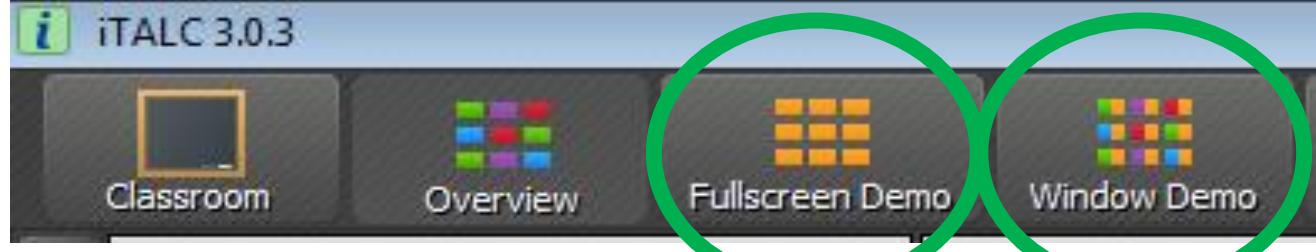

Preuzimanje zalona učenika

- Ako jedan od učenika/studenta treba pomoć, možete pristupiti radnoj ploči učenika/studenta i poticati se
- Učenik/student vidi sve vaše akcije i tako je u stanju naučiti nove postupke

Demonstracija

- Prostor na zaslonu učitelja prenosi se na sva ostala računala u stvarnom vremenu
- Fullscreen Demo – učiteljev zaslon se dijeli. Učenik/student ne može raditi u ovom načinu jer su svi ulazni uređaji onemogućeni. Na taj način dobivate punu pozornost vaših učenika
- Window Demo - učiteljev zaslon se dijeli, ali i omogućuje učenicima/studentima da se prebace između nastavnikovog prozora i vlastitog prozora. Ulazni uređaji nisu blokiranih

Usmjeravanje pažnje

- Značajka Lock all omogućuje učitelju usmjeravanje pažnje svih učenika na prednji dio učionice zaključavanjem svih računala i blokiranjem ulaznih uređaja
- Držite svoje učenike fokusiranim na zadatak, ograničavanjem njihovog pristupa određenim web stranicama i aplikacijama

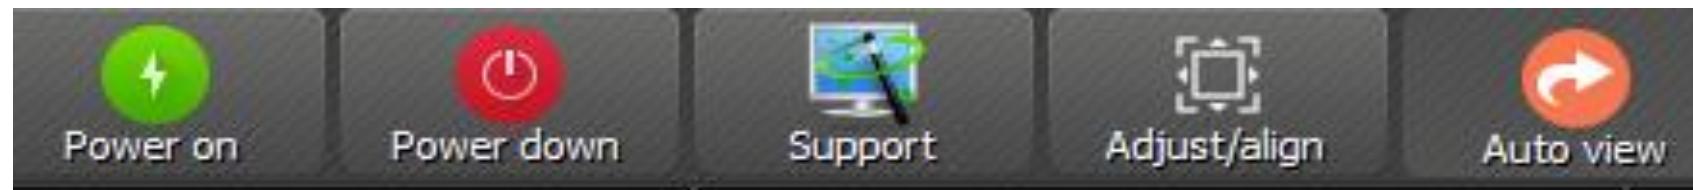

Komunicirati

- Komunikacijske značajke pomažu nastavnicima učinkovitije komunicirati s učenicima unutar učionice
- Učitelji mogu poslati poruku kako bi pomogli učeniku/studentu, razgovarati s pojedincem ili grupom studenata i brzo odgovoriti na pitanja

Uštedite vrijeme

- Povećajte dragocjeno vrijeme učionice pomoću brzih alata i prilagođenih postavki
- Pošaljite i skupite zadaće domaće zadaće
- Jednim klikom uključivanje/isključivanje svih računala u mreži

Instalacija programa - računalo nastavnika

Obavezno ostaviti uključeno iTALC Master na računalu nastavnika

User interface

 Enable high DPI scaling

Language: Use system language setting

iTALC Service

 Hide tray icon Enable desktop switching for screen lock (experimental) AutostartAdditional arguments State: **Running**

Start service Stop service

Logging

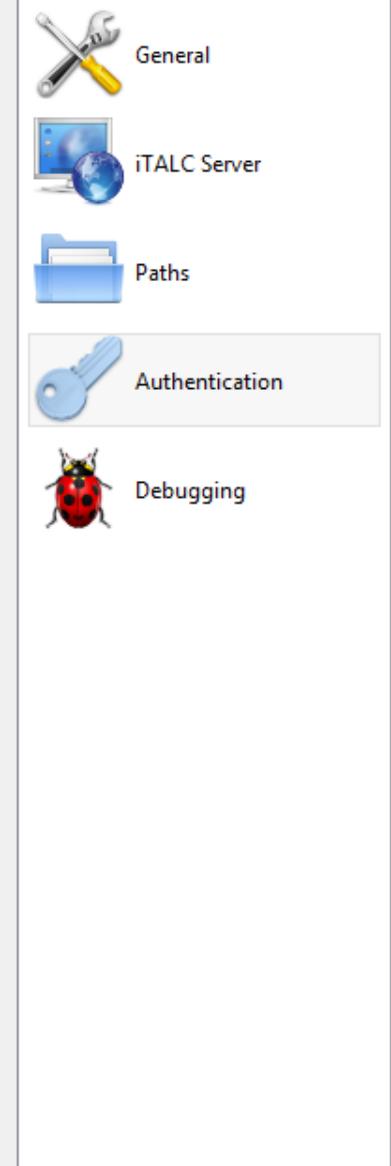

Log file directory %TEMP%Log level Information, warnings and errors Limit log file size 0 MB Log to standard error output Log to Windows event log

Clear all log files

Nakon instalacije i prvog pokretanja programa
pojavljuje se izbornik iTALC management u
kojem je potrebno odabratи Authentication

Reset

Apply

Authentication methods

Key file authentication
 ACL-based logon authentication (This option is circled in red.)

Access key management

Public key file base directory: \$GLOBALAPPDATA\keys\public (With a copy icon to the right)

Private key file base directory: \$GLOBALAPPDATA\keys\private (With a copy icon to the right)

Launch key file assistant (This option is circled in red.)

Logon settings

Manage permissions Test

Access confirmation

You can configure iTALC to ask the user for permission to access the desktop when using certain authentication methods.

Key file authentication
 Logon authentication
 Allow same user to access desktop without confirmation

- 1) Isključiti ACL-based logon authentication
- 2) Odabrati Launch key file assistent

Create/import iTALC access keys

This assistant will help you to create or import iTALC access keys.

How does it work?

iTALC access keys consist of two parts belonging together, a private and a public key part.

Using the private key part, users on the master computer will be able to access client computers. It is important that only authorized users have read access to the private key file.

The public key part is used on the client computers to verify that any incoming connection request is authorized.

Select user role

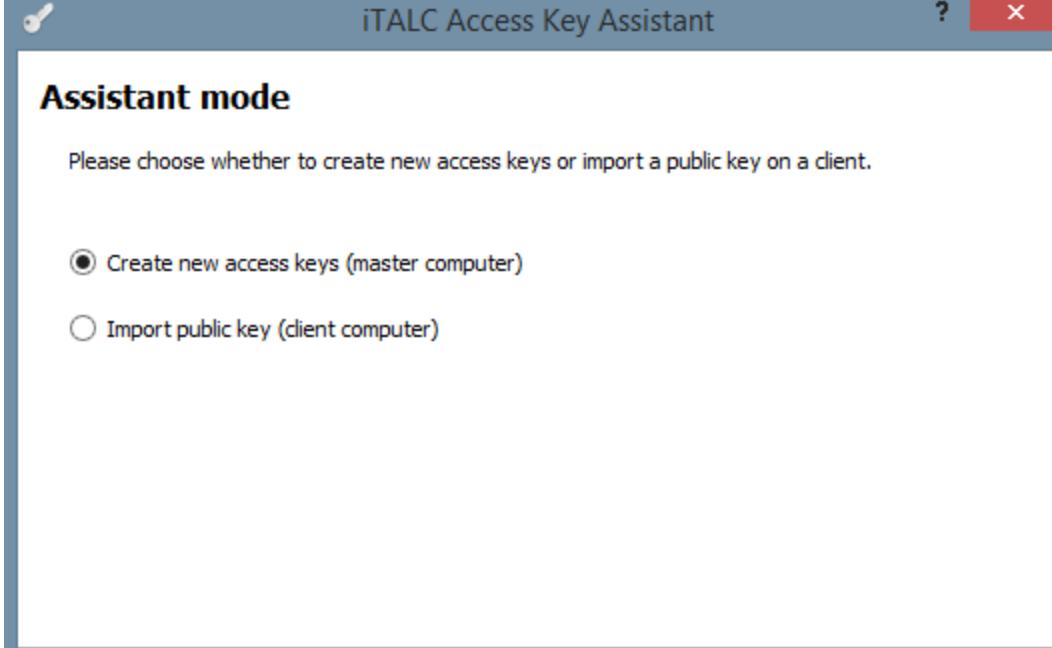

Please select a user role for which to create or import the access keys:

Teacher

User roles allow using multiple access keys in parallel. For example there can be different teacher access keys for each classroom while the support access keys are the same for the whole school.
